

Informattec has become the leading Swiss BI specialist, with five Qlik areas of sector expertise.

Informattec is at the top of Qlik sector expertise in Switzerland. BI specialist Informattec, based in Muttenz, is the first solution partner in Switzerland of Qlik®, leader in visual analytics, to have obtained five of the eight major areas of sector expertise awards. They have thus demonstrated their professional QlikView and BI know-how, as well as their wide practical experience in the industry in terms of customer-oriented consulting and the implementation of sophisticated BI solutions, in the retail & services, energy & utilities, manufacturing & high tech, financial services and healthcare sectors.

Muttenz, May 24, 2016 - Qlik partner since 2008, Informattec is now one of the selected Qlik solution providers in Switzerland. Over the past eight years, the BI specialist from Muttenz, near Basel, has accrued a wealth of experience in the implementation of over 250 Qlik projects in all sectors. Due to these merits, they also received the 2013 Qlik "Partner of the Year" award. On this broad base and thanks to the development of their own BI framework iVIEW, based on Qlik, the ambitious program for the certification of the coveted sector expertise award has been successfully completed in a record time of only 5 months. Thus Informattec is optimally equipped for the demanding BI needs of discerning SMEs and large companies in Switzerland.

Sophisticated expertise program

Qlik sector expertise, widely appreciated by BI users, prepared Informattec in the targeted sectors through successful implementation of sophisticated client projects. In the actual certification process, which has been taking place for the past few months, in addition to each of the five expert areas, four customer applications had to be selected and described in detail. These were subsequently audited by a Qlik expert and their sector relevance validated. Marcel D. Schläpfer, Country Manager of Qlik Switzerland, explains: "Proven industry expertise is an important point of reference for our clients when seeking the right partner. We therefore check inputs very carefully. I am extremely pleased that we have been able to award our Qlik partner Informattec with comprehensive five competencies sector expertise in Switzerland."

Certified know-how, Qlik training centre and Swiss BI Cloud

Informattec has a highly qualified team of BI consultants and software developers in the industry who understand how to deal professionally and competently both with QlikView as well as with the latest offspring of the Qlik family, Qlik Sense. This has been demonstrated on the one hand by the complete certification for both products and on the other hand by the Qlik training centre in the Basel area, which is directly operated by Informattec in Muttenz. Last but not least, Informattec is the only BI firm in Switzerland that also offers the option of a specially prepared Swiss BI Cloud for all of its solutions based on Qlik technology.
