AI Success with DataRobot

Building powerful models quickly and easily is important, but businesses realize the greatest value when models are integrated into core processes — and this can be difficult for many organizations. DataRobot is a trusted AI partner that can empower your existing team to identify and apply data science as needed or execute portions of your AI vision on your behalf. DataRobot personnel and resources that are available to you include:

- **Customer Facing Data Scientists (CFDS):** Our unique CFDS team will work closely with you to identify opportunities, support use cases, and enable value-producing users.

- **Field Engineers:** Every environment is unique, and we'll work with your IT team to integrate DataRobot within your infrastructure and production pipelines.

- **AI Success Managers:** We'll assign an experienced AI Success Manager who will create and manage your custom-tailored Success Plan, engagement activities, and project resources, while also serving as your personal advocate within DataRobot.

- **DataRobot University (DRU):** Through a practical, hands-on curriculum, we deliver education for DataRobot users, from executives to analysts to data scientists.

- **Customer Support:** We have you covered with specialist knowledge and a fanatical focus on customer support.

The actual work of creating and deploying models with DataRobot took very little time... It was almost unbelievable.

- Julia Kurnia, Director, Zidisha

DataRobot frees us to do real data science. This creative and experimental approach would be impossible using the old-fashioned approach of manually developing machine learning models.

- Kim Gregersen
  Solutions architect at One Marketing

DataRobot: Your AI Autopilot

Autopilot mode lets you go from data to decision in six easy steps.

1. Ingest data from a variety of different sources.
2. Select what you want to predict and press Start.
3. Automatically build and test hundreds of models to find the best fit.
4. Evaluate each model or select the one that DataRobot recommends for deployment.
5. Get insights about your data, including the explanations behind the predictions.
6. Deploy the model and make predictions in your application.

Autopilot provides guardrails to keep you from missing critical steps in the process. With the platform’s built-in best practices and flexible API, experts can tweak, tune, and interpret every model with ease.

Who Uses DataRobot?

DataRobot is transforming businesses across industries, including:

- Insurance
- Banking
- Fintech
- Public Sector
- Healthcare
- Marketing
- Sports Analytics
- Hospitality and Travel
- Manufacturing
- Energy
- Retail

As we get better and forecast accuracy keeps improving, people are becoming more confident and trusting of the process, the data, the models, and DataRobot.

– Rodrigo Bertin
Senior Business Development Manager, Lenovo

DataRobot works with global players and nimble, data-driven companies across industries, including:
