## THE FUTURE ON THE HORIZON. THE SAILS ARE SET.

Dedicated to the company motto „experience the sense of tomorrow“, Informatec has established itself as a specialist in consultancy and the introduction of comprehensive business intelligence (BI) solutions in Switzerland.

As BI innovator for ambitious SMEs, Informatec serves prestigious companies in a continuously growing customer base. The common denominator among all these customers is their quest for enterprise-wide transparency to uncover cost traps and sales potential.

This quest is a promise for Informatec. And that promise is fulfilled in a concrete solution: Thanks to iVIEW, business-relevant data is displayed in easily accessible and tangible information bites, facilitating the generation of sound strategic and operational options.

Transparent and reliable company management is thus no longer utopian, but a successful tomorrow.

## FROM EXPERIENCED IT PROFESSIONALS TO ENTHUSIASTIC BI SPECIALISTS.

The company, founded in 1998 by the graduate business IT specialist Rino Mentil, positioned itself in the early years as a classic IT service provider offering extensive services.

In order to remain an attractive long-term partner for clients and employees, Informatec has evolved over the course of the time from being generalists to specialists. Today, the company entirely focuses on consultation on and the implementation of comprehensive BI solutions.

Whether management, consultants or software developers: The BI professionals at Informatec stand for high-quality, sustainable, and individualised services, which are used cross-functionally across industries, sectors, and source systems.

**„Thanks to our strategic positioning, our clear focus on business intelligence and our unique iVIEW BI solution, we now have a much keener profile. Today we are recognised throughout German-speaking Switzerland as leading BI innovator for SMEs.“**

Rino Mentil, CEO Informatec

**CUSTOM-STANDARD BI.  
THE REVOLUTIONARY  
BI FRAMEWORK.**

iVIEW represents a real innovation for business intelligence in the sophisticated SME environment and is unique as a technical and methodological reference architecture for the controlling and management needs of future-oriented clients.

Conceived as a "custom standard" platform, iVIEW can be rapidly and cost-effectively implemented in any IT system landscape. At the same, iView offers all the benefits of a customised individual solution, thanks to its open architecture: free customisable interface, integration of any data source and high flexibility for maximum performance.

DASHBOARDS

**„The employees of Informattec are not only technically excellent, they are quick to grasp company processes. They are straightforward and the customer is centre stage.“**

Rudolf Büchi, data quality manager, enpuls AG (EKZ group)

**„We valued very highly the fact that Informattec also offered the necessary support during critical phases. And with an energy and enthusiasm which was above and beyond.“**

URS Mathis, project manager, Axpo Informatik AG

**„We have received a process-oriented «practitioners' tool» and our collaboration has been more than successful. This collaborativeway of working results in synergies and accelerates the processes.“**

Daniel Steiner, CFO Direct Mail Company AG

## **YOUNG MIND. SENIOR EXPERTISE.**

With the conviction that each client is a privilege and each project a common creation process with the customer, Informattec takes up new challenges with curiosity and openness.

This dynamic attitude results in agility and ongoing innovative power, which surprises clients with quick and goal-oriented solution implementation.

Informattec ensures a professional implementation of the projects, thanks to extensive experience, and convinces by capacity for insight into individual client processes.

As a competitive protagonist in the German Swiss BI environment, Informattec offers substantial added value with sustainable effect for successful business management.
