iVIEW
Individual-Standard-BI

CUSTOM-STANDARD BI. THE REVOLUTIONARY BI FRAMEWORK.

iVIEW represents a real innovation for business intelligence in the sophisticated SME environment and is unique as a technical and methodological reference architecture for the controlling and management needs of future-oriented clients.

Conceived as a "custom standard" platform, iVIEW can be rapidly and cost-effectively implemented in any IT system landscape. At the same, iView offers all the benefits of a customised individual solution, thanks to its open architecture: free customisable interface, integration of any data source and high flexibility for maximum performance.
