

Press release

Four long-term Informattec employees participate in the company

Four long-term employees of the BI specialist Informattec GmbH, headquartered in Muttenz, have acquired 35% participation in the company, thus complementing the management team. Thanks to their strategy focused on business intelligence, launched in 2015, growth at Informattec has been registered in double figures in recent years. This transaction will help to further accelerate the successful implementation of this strategy and continue the growth trajectory.

Muttenz, April 27, 2017 - With the incorporation of four long-term employees into the company's circle of shareholders, Informattec strengthens their entrepreneurial leadership and underpins the planned growth of the company. "Our new partners have proved themselves as leading employees at Informattec over many years and have contributed decisively to today's stronger market position," explains Rino Mentil. "We also thought the time had come to share corporate responsibility and the prospects of further opportunities arising in the future", continues Margarida Mentil, co-founder and Head of Finance.

Entire management team composed of shareholders

With the inclusion of the four new partners, a complete management team has been created out of the company's shareholders. Philipp Manto is joining as Head of Operations & Services, Christian Fischer as Head of Sales & Business Development, Flávio Soares as Head of Solutions & Technology and Oliver Ruf as Head of Consulting & Projects. Rino Mentil remains the company CEO.

An excellent basis for further growth

With the inclusion of the four new partners, Informattec has an excellent basis to further implement its vision for 2020. At the centre of this vision for the future is the transformation into a product-oriented service company on the basis of their own individual standard BI platform iVIEW, developed in-house, along with the corresponding development of a market-leading position in the Basel area. "True to our motto 'Experience the sense of tomorrow', we have already taken a step further and developed the main tenets of our company up until 2025." Thus Rino Mentil describes the visionary participation process of the founders. "This decision will help us to bring additional pace and dynamism into our development and, above all, to take even more advantage of the momentum of the rapidly evolving market for business intelligence solutions," concludes Rino Mentil.
