

Press release

Informattec and Calyps will serve BI customers throughout Switzerland

Informattec from Muttenz and Zurich and Calyps from Sion and Lausanne are establishing a strategic cooperation. The two companies will be offering their business intelligence products and Qlik expertise to SMEs, enterprise and large customers throughout Switzerland. For customers, this creates a strong and competent provider of and partner for Qlik-based BI solutions.

Muttenz, 14.11.2018 – The primary focus of the partnership is on the two business intelligence products from Informattec and Calyps. Calyps will market iVIEW for ABACUS, the number one business intelligence platform in the Abacus environment, in French-speaking Switzerland and Ticino, while Informattec will deploy Calyps' BI solution MediCAL, which focuses on the healthcare sector, in German-speaking Switzerland. In addition, both companies will support each other in the Qlik project business and thus be the BI partner of choice for customers. Together, the two companies have a pool of over 25 highly trained and experienced BI and Qlik consultants.

"Through this cooperation, Informattec now has a presence in French-speaking Switzerland and Calyps now has a presence in German-speaking Switzerland. This cooperation will thus be able to serve the main economic areas of the Geneva, Lausanne, Zurich, Basel and Berne regions more broadly and intensively. This is a major advantage, especially for customers operating throughout Switzerland and internationally," explains Informattec CEO Rino Mentil, as one of the reasons for the strategic partnership. "Our two companies fit together very well both in terms of their technical and product orientation and culturally. Both factors are a solid guarantee for a mutually prosperous collaboration." concludes Rino Mentil.

"With Informattec, we are teaming up with a leading BI company in the German-speaking part of Switzerland as a partner, which I am very pleased about", explains Calyps CEO Tony Germini. "This cooperation reflects a stronger and broader technical competence, provides access to a professional and experienced pool of Qlik and Jedox experts and gives us the leading Abacus BI tool iVIEW for ABACUS. With this tool we want to serve all Abacus customers in Western Switzerland. In German-speaking Switzerland we also see great potential for the MediCAL platform, which focuses on healthcare," Tony concludes.

About Informatec

With its focus on business intelligence, Informatec has established itself as a specialist in consulting and needs-based implementation of comprehensive BI solutions for analysis, reporting and planning. Founded in 1998 in the Basel area, the company is regarded as a BI innovator for demanding SMEs, and enterprise customers and counts leading companies among its continuously growing clientele. With its services, Informatec ensures that the numerous advantages of the self-developed BI platform iVIEW, based on Qlik and Jedox, are available without restriction. Services offered include consulting, concept and customer specific developments as well as implementation, training, maintenance and support.

About Calyps

Since its foundation in 2001, the company has been providing BI solutions to SMEs as well as to large corporate customers across industries. The focus is on analytics, real-time reporting and planning, with the latter increasingly including the prediction of operational process events. Since around 2012, Calyps has increased its focused on Qlik technology and sector-wise on the financial sector, but above all on the healthcare sector. With its robust MediCAL platform, Calyps has been well received by a growing number of hospitals in Western Switzerland. The range of services offered to customers includes consulting, concept development and the implementation of tailor-made solutions as well as support.
