

NodeGraph

**Because everyone
has the right to
understand their
data**

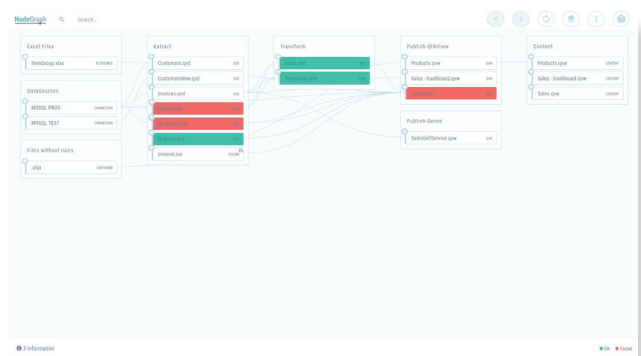

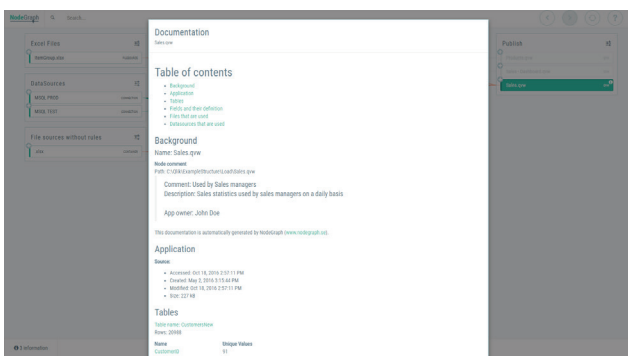

Put governance first

Secure and maintain a seamless governance infrastructure with the help of our data governance tools.

Explore data lineage

Visualize and trace where your data comes from and how it is connected – from data source to end-user application.

Stay up-to-date

Generate your Qlik® documentation automatically and stay up-to-date with the help of test and visualization tools.

Trust your data

Gain understanding of what goes on behind the scenes of your Qlik® Solution by using our testing, governance, and visualization features.

Now you can test your data!

With the help of **unit and regression testing**, our Test Module secures that your data is following your set guidelines – allowing you to feel secure in your data.

YOUR DATA STARTS HERE
