

5 reasons you  
should *NOT* be using  
**NodeGraph**

# 5 reasons you should *NOT* be using NodeGraph

1. You think it's exciting to wonder where your data comes from
2. You find it therapeutic to manually document everything
3. You think it's best if there's only one person who knows how your Qlik solution is built
4. You think "Data Governance" and "Data Lineage" are nothing but trendy industry buzzwords
5. You're too spontaneous and fun-loving to worry about consequences

*Obviously, we are kidding. Please contact us if this is NOT you.*

YOUR DATA STARTS HERE

**NodeGraph**
