

Experience the sense of tomorrow!

With a clear focus on business intelligence, Informattec has established itself as a specialist consultant for bespoke implementation of comprehensive BI solutions for analysis, reporting and planning. The company, based in the Basel area, was founded in 1998 and is considered a BI innovator for sophisticated SME and major clients, with leading companies among a continuously growing client base. The service range includes consulting, design and custom development, as well as implementation and training, maintenance and support.

Web Engineer – Full Stack Developer

Are you a data driven Web Developer, who likes to set new standards and is always willing to learn?

In the course of the expansion of our activities, we are looking for a highly-motivated and dedicated personality to complement our new Data Intelligence Hub in Lisbon, immediately or by agreement.

Your tasks

- You will work in exciting projects in various business sectors, using state-of-the-art frontend and backend technologies and tools
- You will be responsible for the development of web applications within our product development strategy in close cooperation with our BI team in Switzerland
- You will ensure a straightforward, user-friendly and functional user interface according to modern UX best practices

Your profile

- Computer science education with academic degree (university, applied sciences or equivalent)
- At least 1-2 years of experience in analysis, design and implementation of front-end solutions based on Angular 2+.
- Experience and good understanding of JavaScript and SCSS concepts
- Sound knowledge of JAVA, Spring Boot, and Hibernate.
- Experience with the following or analogous technologies and concepts: REST API, Websockets, MVC, relational databases
- Initial or basic experience in the BI field (ideally with QlikView/Qlik Sense) is a plus
- You are a Team Player, self-driven and motivated, highly pro-active and resilient attitude, open-minded with a meticulous working method
- Fluent in English (oral and written), German is an advantage

Location: Lisbon, Portugal

Our offer

A challenging work environment, in a dynamic and experienced team. You can expect a modern workplace, attractive employment conditions and exciting projects. With us you can make things happen!
